

## Rabbit anti-Human Epigen Polyclonal Antibody | anti-EPGN antibody

Epigen Polyclonal Antibody

|                               |                       |                            |                                            |
|-------------------------------|-----------------------|----------------------------|--------------------------------------------|
| CATALOG #<br><b>AAA171791</b> | HOST<br><b>Rabbit</b> | REACTIVITY<br><b>Human</b> | APPLICATIONS<br><b>ELISA, Western Blot</b> |
|-------------------------------|-----------------------|----------------------------|--------------------------------------------|

### PRODUCT SYNONYMS

Epigen; Polyclonal Antibody; Epigen Polyclonal Antibody; EPGN; Epithelial mitogen; EPG; anti-EPGN antibody

### PRODUCT SPECIFICATIONS

|                                                |                                                                              |
|------------------------------------------------|------------------------------------------------------------------------------|
| Host                                           | Rabbit                                                                       |
| Reactivity                                     | Human                                                                        |
| Clonality                                      | Polyclonal                                                                   |
| Isotype                                        | IgG                                                                          |
| Purity/Purification                            | Antigen Affinity Purified                                                    |
| Concentration                                  | 1 mg/ml (varies by lot)                                                      |
| Applicable Applications for anti-EPGN antibody | ELISA, WB (Western Blot)                                                     |
| Immunogen                                      | Synthesized peptide derived from the Internal region of human Epigen.        |
| Buffer                                         | PBS, pH 7.4, containing 0.02% sodium azide as Preservative and 50% Glycerol. |
| Preparation and Storage                        | Store at -20 degree C. Avoid freeze / thaw cycles.                           |
