

Monkey Desacyl Ghrelin ELISA Kit | D-GHR elisa kit

Monkey Desacyl Ghrelin ELISA Kit

CATALOG #
AAA17239

REACTIVITY
Monkey

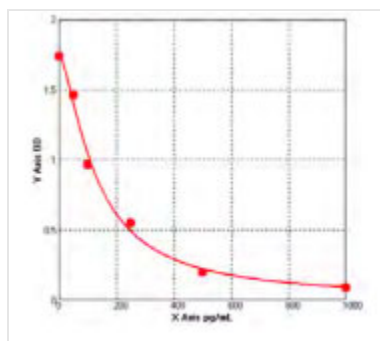

PRODUCT SYNONYMS

Desacyl Ghrelin; Monkey Desacyl Ghrelin ELISA Kit; D-GHR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of DGHRL. No significant cross-reactivity or interference between DGHRL and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between DGHRL and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for D-GHR elisa kit	Principle of the Assay: DGHRL ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-DGHRL antibody and an DGHRL-HRP conjugate. The assay sample and buffer are incubated together with DGHRL-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the DGHRL concentration since DGHRL from samples and DGHRL-HRP conjugate compete for the anti-DGHRL antibody binding site. Since the number of sites is limited, as more sites are occupied by DGHRL from the sample, fewer sites are left to bind DGHRL-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The DGHRL concentration in each sample is interpolated from this standard curve. Intended Uses: This DGHRL ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey DGHRL. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
---	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
