

Rabbit APEH Polyclonal Antibody | anti-APEH antibody

APEH Polyclonal Antibody

CATALOG # AAA174249	HOST Rabbit	REACTIVITY Human, Mouse, Rat	APPLICATIONS Immunofluorescence, Western Blot
-------------------------------	-----------------------	--	---

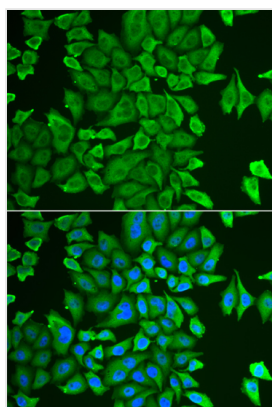

PRODUCT SYNONYMS

APEH; Polyclonal Antibody; APEH Polyclonal Antibody; AARE; ACPH; Acyl peptide hydrolase; Acyl-peptide hydrolase; Acylamino acid releasing enzyme; Acylamino-acid-releasing enzyme; Acylaminoacyl peptidase; Acylaminoacyl-peptidase; APH; N acylaminoacyl peptide hydrolase; OPH; Oxidized protein hydrolase; anti-APEH antibody

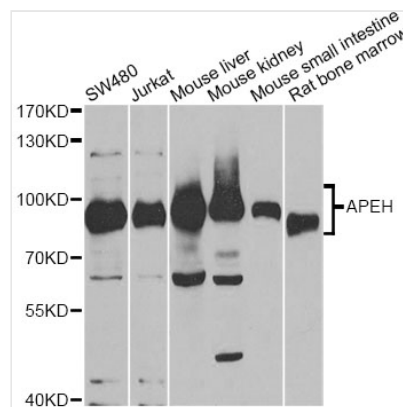

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Isotype	IgG
Purity/Purification	Affinity Purification
Form/Format	PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Concentration	1 mg/mL (varies by lot)
Sequence Length	732
Applicable Applications for anti-APEH antibody	IF (Immunofluorescence), WB (Western Blot)
Immunogen	Recombinant protein of human APEH
Conjugation	Unconjugated
Preparation and Storage	Store at -20 degree C. Avoid freeze/thaw cycles.

IMAGES

IF (Immunofluorescence)

Immunofluorescence analysis of HeLa cells using APEH antibody.

WB (Western Blot)

Western blot analysis of extracts of various cell lines, using APEH antibody.

ADDITIONAL INFORMATION

Related Product Information for anti-APEH antibody	This gene encodes the enzyme acylpeptide hydrolase, which catalyzes the hydrolysis of the terminal acetylated amino acid preferentially from small acetylated peptides. The acetyl amino acid formed by this hydrolase is further processed to acetate and a free amino acid by an aminoacylase. This gene is located within the same region of chromosome 3 (3p21) as the aminoacylase gene, and deletions at this locus are also associated with a decrease in aminoacylase activity. The acylpeptide hydrolase is a homotetrameric protein of 300 kDa with each subunit consisting of 732 amino acid residues. It can play an important role in destroying oxidatively damaged proteins in living cells. Deletions of this gene locus are found in various types of carcinomas, including small cell lung carcinoma and renal cell carcinoma.
Product Categories/Family for anti-APEH antibody	Cancer; Cell biology

NCBI AND UNIPROT INFORMATION

NCBI GI #	23510451
NCBI GeneID	327
NCBI Accession #	NP_001631.3
NCBI GenBank Nucleotide #	NM_001640.4
UniProt Accession #	P13798; Q9BQ33; Q9P0Y2
Molecular Weight	Calculated: 81kDa Observed: 80-108kDa
NCBI Official Full Name	acylamino-acid-releasing enzyme
NCBI Official Synonym Full Names	acylaminoacyl-peptide hydrolase
NCBI Official Symbol	APEH
NCBI Official Synonym Symbols	APH; OPH; AARE; ACPH; D3S48E; D3F15S2; DNF15S2
NCBI Protein Information	acylamino-acid-releasing enzyme
UniProt Protein Name	Acylamino-acid-releasing enzyme
UniProt Gene Name	APEH
UniProt Synonym Gene Names	D3F15S2; D3S48E; DNF15S2; AARE; APH; OPH

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
