Conjugation	PE/Cyanine5
Usage	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. The amount of the reagent is suggested to be used 2uL or 5uL of antibody per test (million cells in 100ul staining volume or per 100ul of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
Preparation and Storage	Ships on blue ice. Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.
