ADDITIONAL INFORMATION

Related Product Information for anti-GRASP antibody	This gene encodes a protein that functions as a molecular scaffold, linking receptors, including group 1 metabotropic glutamate receptors, to neuronal proteins. The encoded protein contains conserved domains, including a leucine zipper sequence, PDZ domain and a C-terminal PDZ-binding motif. Alternately spliced transcript variants have been observed for this gene.
Product Categories/Family for anti-GRASP antibody	Cancer; Neuroscience; Signal transduction
