ADDITIONAL INFORMATION

Related Product Information for anti-BEX1 antibody	Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).
Product Categories/Family for anti-BEX1 antibody	Cancer; Neuroscience; Signal transduction
