ADDITIONAL INFORMATION

Related Product Information for anti-EPCAM antibody	Epithelial cell adhesion molecule (EpCAM,CD326) is a type I transmembrane glycoprotein that functions as a homophilic, epithelial-specific intercellular cell-adhesion molecule. In addition to cell adhesion, EpCAM is also involved in cellular signaling, cell migration, proliferation, and differentiation. EpCAM is highly expressed on most carcinomas and therefore of potential use as a prognostic marker for a variety of carcinomas, and has become a therapeutic target.
