ADDITIONAL INFORMATION

Related Product Information for anti-ETS1 antibody	This gene encodes a member of the ETS family of transcription factors, which are defined by the presence of a conserved ETS DNA-binding domain that recognizes the core consensus DNA sequence GGAA/T in target genes. These proteins function either as transcriptional activators or repressors of numerous genes, and are involved in stem cell development, cell senescence and death, and tumorigenesis. Alternatively spliced transcript variants encoding different isoforms have been described for this gene.
Product Categories/Family for anti-ETS1 antibody	Cancer; Cardiovascular; Epigenetics and Nuclear Signaling
