ADDITIONAL INFORMATION

Related Product Information for anti-BRF2 antibody	This gene encodes one of the multiple subunits of the RNA polymerase III transcription factor complex required for transcription of genes with promoter elements upstream of the initiation site. The product of this gene, a TFIIIB-like factor, is directly recruited to the TATA-box of polymerase III small nuclear RNA gene promoters through its interaction with the TATA-binding protein.
Product Categories/Family for anti-BRF2 antibody	Cancer; Epigenetics and Nuclear Signaling
