ADDITIONAL INFORMATION

Related Product Information for anti-VSNL1 antibody	This gene is a member of the visinin/recoverin subfamily of neuronal calcium sensor proteins. The encoded protein is strongly expressed in granule cells of the cerebellum where it associates with membranes in a calcium-dependent manner and modulates intracellular signaling pathways of the central nervous system by directly or indirectly regulating the activity of adenylyl cyclase. Alternatively spliced transcript variants have been observed, but their full-length nature has not been determined.
Product Categories/Family for anti-VSNL1 antibody	Cancer; Signal Transduction
