

Canine Cortisol ELISA Kit

QuickKey Pro Dog Cortisol ELISA Kit

CATALOG #
AAA177826

REACTIVITY
Canine

PRODUCT SYNONYMS

Cortisol; QuickKey Pro Dog Cortisol ELISA Kit; 11beta; 17alpha; 21-Trihydroxypregn-4-ene-3; 20-dione; Cortisol elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This kit recognizes Canine Cortisol in samples. No significant cross-reactivity or interference between Canine Cortisol and analogues was observed
Assay Type	Quantitative Competitive
Samples	Canine serum and plasma samples
Detection Range	3.13-200 ng/mL
Sensitivity	1.13 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Canine Cortisol were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Canine Cortisol were tested on 3 different plates, 20 replicates in each plate, respectively.
Preparation and Storage	An unopened kit can be stored at 2-8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for Cortisol elisa kit	Principle of the Assay: This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Canine Cortisol. Samples (or Standards) and Horseradish Peroxidase (HRP) linked antibody specific for Canine Cortisol are added to the micro ELISA plate wells. Canine Cortisol in samples (or standards) competes with a fixed amount of Cortisol on the solid phase supporter for sites on the HRP linked detection antibody specific to Cortisol. Excess conjugate and unbound sample or standard are washed from the plate. The substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450±2 nm. The concentration of Canine Cortisol in the samples is then determined by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Cortisol concentrations in Canine serum and plasma samples. Please contact tech-support for other sample type detection.
