

General OTC (Oxytetracycline) ELISA Kit | OTC elisa kit

OTC (Oxytetracycline) ELISA Kit

CATALOG #
AAA177865

REACTIVITY
General

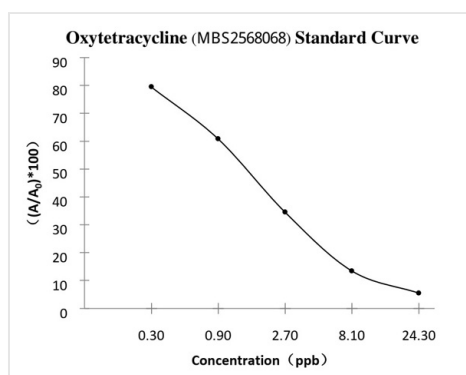

PRODUCT SYNONYMS

OTC (Oxytetracycline); OTC (Oxytetracycline) ELISA Kit; OTC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Assay Type	Competitive
Sensitivity	0.3 ppb (ng/mL)
Preparation and Storage	Store at 2-8 degree C. Avoid freeze/thaw cycles. Estimated Exp: >=10 months

ADDITIONAL INFORMATION

Related Product Information for OTC elisa kit

Principle of the Assay: This kit uses Competitive-ELISA as the method. It can detect Oxytetracycline (OTC) in samples, such as muscle, raw milk, feed, etc. This kit is composed of ELISA Microtiter plate, HRP conjugate, antibody working solution, standard and other supplementary reagents. The microtiter plate in this kit has been pre-coated with coupled antigen. During the reaction, OTC in the samples or standard competes with coupled antigen on the solid phase supporter for sites of anti-OTC antibody. Then Horseradish Peroxidase (HRP) conjugate is added to each microtiter plate well, and substrate reagent is added for color development. There is a negative correlation between the OD value of samples and the concentration of OTC. The concentration of OTC in the samples can be calculated by comparing the OD of the samples to the standard curve.
