ADDITIONAL INFORMATION

Related Product Information for F-6-P assay kit	Fructose-6-phosphate (F-6-P) is a six-carbon sugar formed by esterification of fructose and phosphate. It is an important intermediate in glycolysis and gluconeogenesis pathways. As the most basic metabolic substances in the metabolic process of living bodies and cells, it is of great significance to study them quantitatively. Enzyme catalyze F-6-P to produce a specific product, which can react with chromogenic agent to produce the fluorescent substance. Detect the fluorescent intensity of fluorescent substance at the excitation wavelength of 535nm and the emission wavelength of 587nm.
Product Categories/Family for F-6-P assay kit	Metabolism assay; Cell Metabolism Assays; Glycolysis and Lipid Metabolism

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
