

Human Neuromedin B (NMB) ELISA Kit | NMB elisa kit

Human Neuromedin B (NMB) ELISA Kit

CATALOG #
AAA182089

REACTIVITY
Human

PRODUCT SYNONYMS

Neuromedin B (NMB); Human Neuromedin B (NMB) ELISA Kit; NM-B; NMB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of NMB. No significant cross-reactivity or interference between NMB and analogues was observed.
Sequence Length	154
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Quantitative Competitive
Detection Range	123.5-10,000pg/mL
Sensitivity	< 50.4pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level NMB were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level NMB were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for NMB elisa kit	Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of NMB in human serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to NMB has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled NMB and unlabeled NMB (Standards or samples) with the pre-coated antibody specific to NMB. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of NMB in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of NMB in the sample.

NCBI AND UNIPROT INFORMATION

NCBI GI #	45505145
NCBI GeneID	4828
NCBI Accession #	NP_995580.1
NCBI GenBank Nucleotide #	NM_205858.1
UniProt Accession #	P08949; Q96A06; Q96HH5
Molecular Weight	16,309 Da
NCBI Official Full Name	neuromedin-B isoform 2 preproprotein
NCBI Official Synonym Full Names	neuromedin B
NCBI Official Symbol	NMB
NCBI Protein Information	neuromedin-B
UniProt Protein Name	Neuromedin-B
UniProt Gene Name	NMB

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
