

## Human tumor protein, translationally-controlled 1 ELISA Kit | TPT1 elisa kit

Human Translationally-controlled tumor protein, TPT1 ELISA Kit

CATALOG #  
**AAA18209**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

tumor protein; translationally-controlled 1; Human Translationally-controlled tumor protein; TPT1 ELISA Kit; Human Translationally-controlled tumor protein (TPT1) ELISA kit; FLJ27337; HRF; TCTP; p02; fortilin; histamine-releasing factor; TPT1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                 |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of human TPT1. No significant cross-reactivity or interference between human TPT1 and analogues was observed. |
| Sequence Length         | 172                                                                                                                                                                                   |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                 |
| Samples                 | Serum, plasma, tissue homogenates, cell lysates                                                                                                                                       |
| Detection Range         | 12.5 pg/ml-800 pg/ml                                                                                                                                                                  |
| Sensitivity             | < 3.12 pg/ml                                                                                                                                                                          |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess.                                      |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.                                               |
| Preparation and Storage | Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.                                                     |

| Related Product Information for TPT1 elisa kit | Principle of the Assay: This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for TPT1 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any TPT1 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for TPT1 is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of TPT1 bound in the initial step. The color development is stopped and the intensity of the color is measured. |
