

Rabbit Von Willebrand Factor (vWF) ELISA Kit | vWF elisa kit

Rabbit Von Willebrand Factor (vWF) ELISA Kit

CATALOG #
AAA182122

REACTIVITY
Rabbit

PRODUCT SYNONYMS

Von Willebrand Factor (vWF); Rabbit Von Willebrand Factor (vWF) ELISA Kit; F8VWF; VWD; von Willebrand antigen 2; vWF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Specificity	This assay has high sensitivity and excellent specificity for detection of Von Willebrand Factor (vWF). No significant cross-reactivity or interference between Von Willebrand Factor (vWF) and analogues was observed.
Sequence Length	2813
Assay Type	Competitive Inhibition
Samples	Plasma
Detection Range	12.35-1,000ng/mL
Sensitivity	< 4.64ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Von Willebrand Factor (vWF) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Von Willebrand Factor (vWF) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for vWF elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Von Willebrand Factor (vWF) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Von Willebrand Factor (vWF) and unlabeled Von Willebrand Factor (vWF) (Standards or samples) with the pre-coated antibody specific to Von Willebrand Factor (vWF). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Von Willebrand Factor (vWF) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Von Willebrand Factor (vWF) in the sample.

NCBI AND UNIPROT INFORMATION

NCBI GI #	89191868
NCBI GeneID	7450
NCBI Accession #	NP_000543.2
NCBI GenBank Nucleotide #	NM_000552.4
UniProt Accession #	P04275; Q8TCE8; Q99806
Molecular Weight	38,745 Da
NCBI Official Full Name	von Willebrand factor preproprotein
NCBI Official Synonym Full Names	von Willebrand factor
NCBI Official Symbol	VWF
NCBI Official Synonym Symbols	VWD; F8VWF
NCBI Protein Information	von Willebrand factor
UniProt Protein Name	von Willebrand factor
UniProt Gene Name	VWF
UniProt Synonym Gene Names	F8VWF; vWF

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
