

## Mouse Kallikrein 1 (KLK1) ELISA Kit | KLK1 elisa kit

Mouse Kallikrein 1 (KLK1) ELISA Kit

CATALOG #  
**AAA182192**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Kallikrein 1 (KLK1); Mouse Kallikrein 1 (KLK1) ELISA Kit; KLKR; Klk6; HK1; Kallikrein 1; Renal/Pancreas/Salivary; Kidney/pancreas/salivary gland kallikrein; Tissue kallikrein; KLK1 elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Mouse                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Kallikrein 1 (KLK1). No significant cross-reactivity or interference between Kallikrein 1 (KLK1) and analogues was observed.                                                                                                                                                                                                                                                                                    |
| Sequence Length                                   | 262                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for KLK1 elisa kit | This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Kallikrein 1 (KLK1) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Kallikrein 1 (KLK1) and unlabeled Kallikrein 1 (KLK1) (Standards or samples) with the pre-coated antibody specific to Kallikrein 1 (KLK1). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Kallikrein 1 (KLK1) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Kallikrein 1 (KLK1) in the sample. |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
