

Human Glutamate Dehydrogenase 1 (GDH) ELISA Kit | GDH elisa kit

Human Glutamate Dehydrogenase 1 (GDH) ELISA Kit

CATALOG #
AAA183221

REACTIVITY
Human

PRODUCT SYNONYMS

Glutamate Dehydrogenase 1 (GDH); Human Glutamate Dehydrogenase 1 (GDH) ELISA Kit; GLUD1; Glutamate dehydrogenase 1; mitochondrial; GDH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Glutamate Dehydrogenase 1 (GDH). No significant cross-reactivity or interference between Glutamate Dehydrogenase 1 (GDH) and analogues was observed.
Sequence Length	411
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.065ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Glutamate Dehydrogenase 1 (GDH) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Glutamate Dehydrogenase 1 (GDH) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for GDH elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Glutamate Dehydrogenase 1 (GDH). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Glutamate Dehydrogenase 1 (GDH). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Glutamate Dehydrogenase 1 (GDH), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Glutamate Dehydrogenase 1 (GDH) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	15238762
NCBI GeneID	831935
NCBI Accession #	NP_197318.1
NCBI GenBank Nucleotide #	NM_121822.4
UniProt Accession #	Q43314
Molecular Weight	44,524 Da
NCBI Official Full Name	glutamate dehydrogenase 1
NCBI Official Symbol	GDH1
NCBI Official Synonym Symbols	GLUTAMATE DECARBOXYLASE 1; glutamate dehydrogenase 1; GLUTAMATE DEHYDROGENASE 1; MRG7.13; MRG7_13
NCBI Protein Information	glutamate dehydrogenase 1
UniProt Protein Name	Glutamate dehydrogenase 1
UniProt Gene Name	GDH1
UniProt Synonym Gene Names	GDH 1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
