

Human Cholesteryl Ester Transfer Protein (CETP) ELISA Kit | CETP elisa kit

Human Cholesteryl Ester Transfer Protein (CETP) ELISA Kit

CATALOG #
AAA184001

REACTIVITY
Human

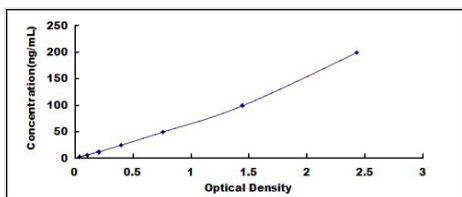

PRODUCT SYNONYMS

Cholesteryl Ester Transfer Protein (CETP); Human Cholesteryl Ester Transfer Protein (CETP) ELISA Kit; LTP; Lipid Transfer Protein; Plasma Lipid Transfer Protein; Cholesterylester Transfer Protein; CETP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Cholesteryl Ester Transfer Protein (CETP). No significant cross-reactivity or interference between Cholesteryl Ester Transfer Protein (CETP) and analogues was observed.
Sequence Length	425
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates and Other Biological Fluids
Detection Range	3.12-200ng/mL
Sensitivity	< 1.31ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Cholesteryl Ester Transfer Protein (CETP) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Cholesteryl Ester Transfer Protein (CETP) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CETP elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cholesteryl Ester Transfer Protein (CETP). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Cholesteryl Ester Transfer Protein (CETP). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cholesteryl Ester Transfer Protein (CETP), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Cholesteryl Ester Transfer Protein (CETP) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	180271
NCBI GeneID	1071
UniProt Accession #	P11597; Q13987; Q13988; Q53YZ1
Molecular Weight	47,787 Da
NCBI Official Full Name	cholesteryl ester transfer protein, partial
NCBI Official Synonym Full Names	cholesteryl ester transfer protein
NCBI Official Symbol	CETP
NCBI Official Synonym Symbols	BPIFF; HDLCQ10
NCBI Protein Information	cholesteryl ester transfer protein
UniProt Protein Name	Cholesteryl ester transfer protein
UniProt Gene Name	CETP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
