

Human Acid Phosphatase 2, Lysosomal (ACP2) ELISA Kit | ACP2 elisa kit

Human Acid Phosphatase 2, Lysosomal (ACP2) ELISA Kit

CATALOG #
AAA186115

REACTIVITY
Human

PRODUCT SYNONYMS

Acid Phosphatase 2; Lysosomal (ACP2); Human Acid Phosphatase 2; Lysosomal (ACP2) ELISA Kit; Lysosomal Acid Phosphatase; ACP2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Acid Phosphatase 2, Lysosomal (ACP2). No significant cross-reactivity or interference between Acid Phosphatase 2, Lysosomal (ACP2) and analogues was observed.
Sequence Length	160
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates and Other Biological Fluids
Detection Range	62.5-4,000pg/mL
Sensitivity	< 24.2pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Acid Phosphatase 2, Lysosomal (ACP2) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Acid Phosphatase 2, Lysosomal (ACP2) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for ACP2 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Acid Phosphatase 2, Lysosomal (ACP2). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Acid Phosphatase 2, Lysosomal (ACP2). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Acid Phosphatase 2, Lysosomal (ACP2), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Acid Phosphatase 2, Lysosomal (ACP2) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	62531185
NCBI GeneID	53
UniProt Accession #	P11117; Q561W5; Q9BTU7; E9PCI1
Molecular Weight	18,417 Da
NCBI Official Full Name	Acid phosphatase 2, lysosomal
NCBI Official Synonym Full Names	acid phosphatase 2, lysosomal
NCBI Official Symbol	ACP2
NCBI Official Synonym Symbols	LAP
NCBI Protein Information	lysosomal acid phosphatase
UniProt Protein Name	Lysosomal acid phosphatase
UniProt Gene Name	ACP2
UniProt Synonym Gene Names	LAP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
