

Interferon tau-1 Recombinant Protein | IFNT1 recombinant protein

Recombinant Bovine Interferon tau-1

CATALOG #
AAA18629

HOST
E Coli or Yeast or Baculovirus or Mammalian Cell

PRODUCT SYNONYMS

Interferon tau-1; Recombinant Bovine Interferon tau-1; Antiluteolysin; Trophoblast antiluteolytic protein; Trophoblast protein 1; TP-1Trophoblastin; IFNT1 recombinant protein

PRODUCT SPECIFICATIONS

Host	E Coli or Yeast or Baculovirus or Mammalian Cell
Purity/Purification	Greater or equal to 85% purity as determined by SDS-PAGE.
Form/Format	Lyophilized or liquid (Format to be determined during the manufacturing process)
Sequence Positions	24-195aa; Full Length of Mature Protein
Sequence	CYLSSEHMLG ARENLRLLAR MNRLSPHPCL QDRKDFGLPQ EMVEGNQLQK DQAISVLHEM LQQCFNLFYT EHSSAAWNTT LLEQLCTGLQ QQLEDLDACL GPVMGEKDSD MGRMGPIITV KKYFQGIHVY LKEKEYSDCA WEIIRVEMMR ALSSSTTLQK RLRKMGGDLN SL
Preparation and Storage	Store at -20 degree C, for extended storage, conserve at -20 degree C or -80 degree C.

ADDITIONAL INFORMATION

Related Product Information for IFNT1 recombinant protein

Paracrine hormone primarily responsible for maternal recognition of pregnancy. Interacts with endometrial receptors, probably type I interferon receptors, and blocks estrogen receptor expression, preventing the estrogen-induced increase in oxytocin receptor expression in the endometrium. This results in the suppression of the pulsatile endometrial release of the luteolytic hormone prostaglandin F2-alpha, hindering the regression of the corpus luteum (luteolysis) and therefore a return to ovarian cyclicity. This, and a possible direct effect of IFN-tau on prostaglandin synthesis, leads in turn to continued ovarian progesterone secretion, which stimulates the secretion by the endometrium of the nutrients required for the growth of the conceptus. In summary, displays particularly high antiviral and antiproliferative potency concurrently with particular weak cytotoxicity, high antiluteolytic activity and immunomodulatory properties. In contrast with other IFNs, IFN-tau is not virally inducible.
