

Human Interferon Alpha 10 (IFNa10) ELISA Kit | IFNa10 elisa kit

Human Interferon Alpha 10 (IFNa10) ELISA Kit

CATALOG #
AAA187215

REACTIVITY
Human

PRODUCT SYNONYMS

Interferon Alpha 10 (IFNa10); Human Interferon Alpha 10 (IFNa10) ELISA Kit; LeIF C; Interferon alpha-C; IFNa10 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Interferon Alpha 10 (IFNa10). No significant cross-reactivity or interference between Interferon Alpha 10 (IFNa10) and analogues was observed.
Sequence Length	189
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates and Other Biological Fluids
Detection Range	15.62-1000pg/mL
Sensitivity	< 26.2pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Interferon Alpha 10 (IFNa10) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Interferon Alpha 10 (IFNa10) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for IFNa10 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Interferon Alpha 10 (IFNa10). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Interferon Alpha 10 (IFNa10). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Interferon Alpha 10 (IFNa10), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Interferon Alpha 10 (IFNa10) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4504589
NCBI GeneID	3446
NCBI Accession #	NP_002162.1
NCBI GenBank Nucleotide #	NM_002171.2
UniProt Accession #	P01566; Q5VV13
Molecular Weight	21,835 Da
NCBI Official Full Name	interferon alpha-10
NCBI Official Synonym Full Names	interferon alpha 10
NCBI Official Symbol	IFNA10
NCBI Official Synonym Symbols	IFN-alphaC
NCBI Protein Information	interferon alpha-10
UniProt Protein Name	Interferon alpha-10
UniProt Gene Name	IFNA10
UniProt Synonym Gene Names	IFN-alpha-10; LeIF C

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
