

Mouse Dihydroorotate Dehydrogenase (DHODH) ELISA Kit | DHODH elisa kit

Mouse Dihydroorotate Dehydrogenase (DHODH) ELISA Kit

CATALOG #
AAA187488

REACTIVITY
Mouse

PRODUCT SYNONYMS

Dihydroorotate Dehydrogenase (DHODH); Mouse Dihydroorotate Dehydrogenase (DHODH) ELISA Kit; DHODEHase; Dihydroorotate oxidase; Dihydroorotate dehydrogenase (quinone); mitochondrial; DHODH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of dermcidin. No significant cross-reactivity or interference between dermcidin and analogues was observed.
Sequence Length	345
Samples	Human Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates And Other Biological Fluids
Assay Type	Quantitative Sandwich
Detection Range	0.78-50ng/mL
Sensitivity	0.29ng/mL.
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level dermcidin were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level dermcidin were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for DHODH elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of dermcidin in human serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to dermcidin. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to dermcidin. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain dermcidin, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of dermcidin in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	319420580
Molecular Weight	38,445 Da
NCBI Official Full Name	Dihydroorotate dehydrogenase
UniProt Protein Name	Dihydroorotate dehydrogenase (quinone)
UniProt Gene Name	pyrD
UniProt Synonym Gene Names	DHOD; DHODase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
