

Rat AXL Receptor Tyrosine Kinase (AXL) ELISA Kit | AXL elisa kit

Rat AXL Receptor Tyrosine Kinase (AXL) ELISA Kit

CATALOG #
AAA187696

REACTIVITY
Rat

PRODUCT SYNONYMS

AXL Receptor Tyrosine Kinase (AXL); Rat AXL Receptor Tyrosine Kinase (AXL) ELISA Kit; UFO; JTK11; Tyrosine-protein kinase receptor UFO; AXL elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of AXL Receptor Tyrosine Kinase (AXL). No significant cross-reactivity or interference between AXL Receptor Tyrosine Kinase (AXL) and analogues was observed.
Sequence Length	885
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma and Other Biological Fluids
Detection Range	2.34-150ng/mL
Sensitivity	< 0.9ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level AXL Receptor Tyrosine Kinase (AXL) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level AXL Receptor Tyrosine Kinase (AXL) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for AXL elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to AXL Receptor Tyrosine Kinase (AXL). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to AXL Receptor Tyrosine Kinase (AXL). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain AXL Receptor Tyrosine Kinase (AXL), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of AXL Receptor Tyrosine Kinase (AXL) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	21619004
NCBI GeneID	558
UniProt Accession #	P30530; Q8N5L2; Q9UD27
Molecular Weight	97,377 Da
NCBI Official Full Name	AXL receptor tyrosine kinase
NCBI Official Synonym Full Names	AXL receptor tyrosine kinase
NCBI Official Symbol	AXL
NCBI Official Synonym Symbols	ARK; UFO; JTK11; Tyro7
NCBI Protein Information	tyrosine-protein kinase receptor UFO
UniProt Protein Name	Tyrosine-protein kinase receptor UFO
UniProt Gene Name	AXL
UniProt Synonym Gene Names	UFO

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
