

Human Keratin 23 (KRT23) ELISA Kit | KRT23 elisa kit

Human Keratin 23 (KRT23) ELISA Kit

CATALOG #
AAA188331

REACTIVITY
Human

PRODUCT SYNONYMS

Keratin 23 (KRT23); Human Keratin 23 (KRT23) ELISA Kit; K23; HAIK1; CK23; Keratin; type I cytoskeletal 23; Cytokeratin-23; KRT23 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of KRT23. No significant cross-reactivity or interference between KRT23 and analogues was observed.
Sequence Length	422
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	0.312-20ng/mL
Sensitivity	< 0.114ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level KRT23 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level KRT23 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for KRT23 elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of KRT23 in human serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to KRT23. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to KRT23. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain KRT23, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of KRT23 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	143811410
NCBI GeneID	25984
UniProt Accession #	Q9C075
NCBI Official Full Name	Keratin, type I cytoskeletal 23
NCBI Official Synonym Full Names	keratin 23
NCBI Official Symbol	KRT23
NCBI Official Synonym Symbols	K23; CK23; HAIK1
NCBI Protein Information	keratin, type I cytoskeletal 23
UniProt Protein Name	Keratin, type I cytoskeletal 23
UniProt Gene Name	KRT23
UniProt Synonym Gene Names	CK-23; K23
UniProt Entry Name	K1C23_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
