

Chicken Lysozyme (LZM) CLIA Kit | LZM clia kit

Chicken Lysozyme (LZM) CLIA Kit

CATALOG # AAA189009	REACTIVITY Chicken	APPLICATIONS CLIA (Chemiluminescence Immunoassay)
-------------------------------	------------------------------	---

PRODUCT SYNONYMS

Lysozyme (LZM); Chicken Lysozyme (LZM) CLIA Kit; Lysozyme; LYZ; Renal Amyloidosis; N-Acetylmuramide Glycanhydrolase; Muramidase; 1; 4-beta-N-acetylmuramidase C; LZM clia kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of Lysozyme (LZM). No significant cross-reactivity or interference between Lysozyme (LZM) and analogues was observed.
Sequence Length	147
Assay Type	Double-antibody Sandwich
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	13.7-10000pg/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 5.4pg/mL
Applicable Applications for LZM clia kit	CLIA (Chemiluminescence Immunoassay)
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Lysozyme (LZM) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Lysozyme (LZM) were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100 Intra-Assay: CV<10% Inter-Assay: CV<12%
Test Principle	The microplate provided in this kit has been pre-coated with an antibody specific to Lysozyme (LZM). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Lysozyme (LZM). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Lysozyme (LZM) level in the sample or standard.
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

NCBI AND UNIPROT INFORMATION

NCBI GI #	45384212
NCBI Accession #	NP_990612.1
NCBI GenBank Nucleotide #	NP_990612.1
UniProt Accession #	P00698
NCBI Official Full Name	lysozyme C
UniProt Protein Name	Lysozyme C
UniProt Gene Name	LYZ

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
