

Mouse Asprosin ELISA Kit | Fbn1 elisa kit

Mouse Asprosin (Asprosin) (Sandwich ELISA) Mini sample ELISA Kit

CATALOG #
AAA189938

REACTIVITY
Mouse

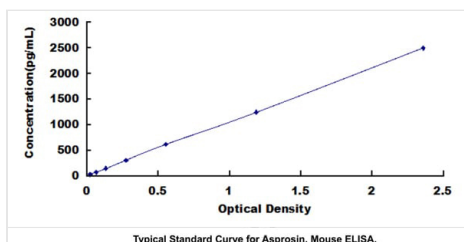

PRODUCT SYNONYMS

Asprosin; Mouse Asprosin (Asprosin) (Sandwich ELISA) Mini sample ELISA Kit; Mini Samples ELISA Kit for Asprosin; Fbn1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of asprosin. No significant cross-reactivity or interference between asprosin and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Mouse serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	39-2,500pg/mL
Sensitivity	< 15pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level asprosin were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level asprosin were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	4 degree C for 1 month/ -20 degree C for long-term(within shelf life). Shelf life is one year

ADDITIONAL INFORMATION

Related Product Information for Fbn1 elisa kit

Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to asprosin. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to asprosin. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain asprosin, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of asprosin in the samples is then determined by comparing the O.D. of the samples to the standard curve.

Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of asprosin in mouse serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	2494284
NCBI GeneID	14118
UniProt Accession #	Q61554; Q60826
Molecular Weight	312,266 Da
NCBI Official Full Name	Fibrillin-1
NCBI Official Synonym Full Names	fibrillin 1
NCBI Official Symbol	Fbn1
NCBI Official Synonym Symbols	Tsk; Fib-1; A1536462; B430209H23
NCBI Protein Information	fibrillin-1; tight skin
UniProt Protein Name	Fibrillin-1
UniProt Gene Name	Fbn1
UniProt Synonym Gene Names	Fbn-1
UniProt Entry Name	FBN1_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
