

Pig Luteinizing Hormone Beta Polypeptide ELISA Kit | LHb elisa kit

Pig Luteinizing Hormone Beta Polypeptide (LHb) (Competitive ELISA) ELISA Kit

CATALOG #
AAA190052

REACTIVITY
Pig

PRODUCT SYNONYMS

Luteinizing Hormone Beta Polypeptide; Pig Luteinizing Hormone Beta Polypeptide (LHb) (Competitive ELISA) ELISA Kit; LH-B; CGB4; LSH-B; hLHB; Lutropin Subunit Beta; Interstitial Cell Stimulating Hormone; Beta Chain; ELISA Kit for Luteinizing Hormone Beta Polypeptide (LHb); LHb elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Pig
Specificity	This assay has high sensitivity and excellent specificity for detection of LHb. No significant cross-reactivity or interference between LHb and analogues was observed.
Assay Type	Quantitative Competitive
Samples	Porcine serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	123.5-10,000pg/mL
Sensitivity	< 45.7pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level LHb were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level LHb were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	4 degree C for 1 month/ -20 degree C for long-term(within shelf life). Shelf life is one year

ADDITIONAL INFORMATION

Related Product Information for LHb elisa kit	Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to LHb has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled LHb and unlabeled LHb (Standards or samples) with the pre-coated antibody specific to LHb. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of LHb in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of LHb in the sample. Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of LHb in porcine serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.
Product Categories/Family for LHb elisa kit	Reproductive science

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
