

General Cyclosporin A ELISA Kit | CsA elisa kit

General species Cyclosporin A (CsA) (Competitive ELISA) ELISA Kit

CATALOG #
AAA190065

REACTIVITY
General

PRODUCT SYNONYMS

Cyclosporin A; General species Cyclosporin A (CsA) (Competitive ELISA) ELISA Kit; Ciclosporin; Cyclosporine; Cyclosporin; ELISA Kit for Cyclosporin A (CsA); CsA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of CsA. No significant cross-reactivity or interference between CsA and analogues was observed.
Assay Type	Quantitative Competitive
Samples	Serum, plasma other biological fluids
Detection Range	780-50,000pg/mL
Sensitivity	< 367pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level CsA were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level CsA were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	4 degree C for 1 month/ -20 degree C for long-term(within shelf life). Shelf life is one year

ADDITIONAL INFORMATION

Related Product Information for CsA elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to CsA has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled CsA and unlabeled CsA (Standards or samples) with the pre-coated antibody specific to CsA. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of CsA in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of CsA in the sample.

Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of CsA in serum, plasma other biological fluids.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
