

## Mouse Fatty Acid Hydroxylase (FAAH) ELISA Kit | FAAH elisa kit

Mouse Fatty Acid Hydroxylase (FAAH) ELISA Kit

CATALOG #  
**AAA190219**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Fatty Acid Hydroxylase (FAAH); Mouse Fatty Acid Hydroxylase (FAAH) ELISA Kit; FAAH ELISA kit (Mouse); Fatty Acid Hydroxylase; FAXDC1; FA2H; Fatty Acid 2-Hydroxylase; Fatty Acid Hydroxylase Domain Containing 1; Fatty acid alpha-hydroxylase; FAAH elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Reactivity              | Mouse                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Fatty Acid Hydroxylase (FAAH). No significant cross-reactivity or interference between Fatty Acid Hydroxylase (FAAH) and analogues was observed.<br>Reactive with Mouse FAAH/Fatty Acid Hydroxylase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

Read at 450nm immediately.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                           |
| Test Principle          | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Fatty Acid Hydroxylase (FAAH). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Fatty Acid Hydroxylase (FAAH). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Fatty Acid Hydroxylase (FAAH), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Fatty Acid Hydroxylase (FAAH) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |

| Preparation and Storage | Store at 4 degree C for 1 month/-20 degree C for long-term (One year within shelf life)<br>The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |
