

## Bovine Bactericidal permeability-increasing protein ELISA Kit | BPI elisa kit

Bovine Bactericidal permeability-increasing protein ELISA Kit

CATALOG #  
**AAA193214**

REACTIVITY  
**Bovine**

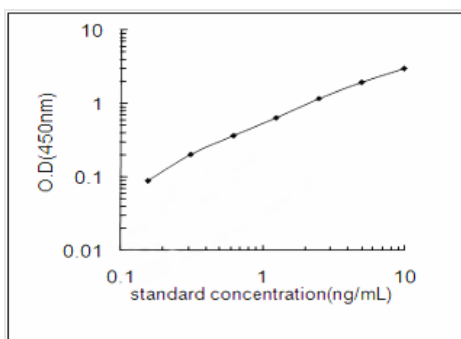

### PRODUCT SYNONYMS

Bactericidal permeability-increasing protein; Bovine Bactericidal permeability-increasing protein ELISA Kit; BPI; BPI elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                     |
|-------------------------|---------------------------------------------------------------------|
| Reactivity              | Bovine                                                              |
| Sequence Length         | 482                                                                 |
| Preparation and Storage | For long term storage, please store the entire kit at -20 degree C. |

### NCBI AND UNIPROT INFORMATION

|                            |                                              |
|----------------------------|----------------------------------------------|
| NCBI GI #                  | 27806919                                     |
| NCBI GeneID                | 280734                                       |
| NCBI Accession #           | NP_776320.1                                  |
| NCBI GenBank Nucleotide #  | NM_173895.2                                  |
| UniProt Accession #        | P17453; Q3T0P4                               |
| Molecular Weight           | 53,442 Da                                    |
| NCBI Official Full Name    | bactericidal permeability-increasing protein |
| NCBI Official Symbol       | BPI                                          |
| NCBI Protein Information   | bactericidal permeability-increasing protein |
| UniProt Protein Name       | Bactericidal permeability-increasing protein |
| UniProt Gene Name          | <b>BPI</b>                                   |
| UniProt Synonym Gene Names | BPI                                          |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
