ADDITIONAL INFORMATION

Related Product Information for anti-PQBP1 antibody	This is a rabbit polyclonal antibody against PQBP1. It was validated on Western Blot using a cell lysate as a positive control. Target Description: This gene encodes a nuclear polyglutamine-binding protein that is involved with transcription activation. The encoded protein contains a WW domain. Mutations in this gene have been found in patients with Renpenning syndrome 1 and other syndromes with X-linked cognitive disability. Multiple alternatively spliced transcript variants that encode different protein isoforms have been described for this gene.
