ADDITIONAL INFORMATION

Related Product Information for anti-ATP7A antibody	This is a rabbit polyclonal antibody against ATP7A. It was validated on Western Blot using a cell lysate as a positive control. Target Description: The ATP7A gene encodes the Menkes copper-translocating P-type ATPase, a ubiquitous protein that regulates the absorption of copper in the gastrointestinal tract. Inside cells, this protein has a dual function: it delivers copper to cuproenzymes in the Gol
