ADDITIONAL INFORMATION

Related Product Information for anti-RNF2 antibody	This is a rabbit polyclonal antibody against RNF2. It was validated on Western Blot and immunohistochemistry Target Description: Polycomb group (PcG) of proteins form the multiprotein complexes that are important for the transcription repression of various genes involved in development and cell proliferation. The protein encoded by RNF2 is one of the PcG proteins. It has been shown to interact with, and suppress the activity of, transcription factor CP2 (TFCP2/CP2). This protein was also found to interact with huntingtin interacting protein 2 (HIP2), an ubiquitin-conjugating enzyme, and possess ubiquitin ligase activity.
