ADDITIONAL INFORMATION

Related Product Information for anti-EGR1 antibody	Early Growth Response Protein 1 (EGR1, Krox-24 protein, nerve growth factor-induced protein A, Transcription factor ETR103, Zinc finger protein 225) belongs to the EGR family of C2H2-type zinc-finger proteins. It is a nuclear protein and functions as a transcriptional regulator. The products of target genes it activates are required for differentiation and mitogenesis. Studies suggest this is a cancer suppressor gene.
