ADDITIONAL INFORMATION

Related Product Information for anti-ZNF16 antibody	This is a rabbit polyclonal antibody against ZNF16. It was validated on Western Blot and immunohistochemistry Target Description: ZNF16 contains a C2H2 type of zinc finger, and thus may function as a transcription factor.The protein encoded by this gene contains a C2H2 type of zinc finger, and thus may function as a transcription factor. This gene is located in a region close to ZNF7/KOX4, a gene also encoding a zinc finger protein, on chromosome 8. Two alternatively spliced variants, encoding the same protein, have been identified.
