ADDITIONAL INFORMATION

Related Product Information for anti-SOX17 antibody	This is a rabbit polyclonal antibody against SOX17. It was validated on Western Blot using a cell lysate as a positive control. Target Description: The SOX17 gene encodes a member of the SOX (SRY-related HMG-box) family of transcription factors involved in the regulation of embryonic development and in the determination of the cell fate. The encoded protein may act as a transcriptional regulator after forming a protein complex with other proteins.
