ADDITIONAL INFORMATION

Related Product Information for anti-LSS antibody	This is a rabbit polyclonal antibody against LSS. It was validated on Western Blot using a cell lysate as a positive control. Target Description: LSS catalyzes the conversion of (S)-2,3 oxidosqualene to lanosterol. It is a member of the terpene cyclase/mutase family and catalyzes the first step in the biosynthesis of cholesterol, steroid hormones, and vitamin D. Two transcript variants encoding the same protein have been found for this gene. The protein encoded by this gene catalyzes the conversion of (S)-2,3 oxidosqualene to lanosterol. The encoded protein is a member of the terpene cyclase/mutase family and catalyzes the first step in the biosynthesis of cholesterol, steroid hormones, and vitamin D. Two transcript variants encoding the same protein have been found for this gene.
