ADDITIONAL INFORMATION

Related Product Information for anti-AOC1 antibody	This is a rabbit polyclonal antibody against ABP1. It was validated on Western Blot and immunohistochemistry Target Description: ABP1 is a membrane glycoprotein that is expressed in many epithelium-rich and/or hematopoietic tissues and oxidatively deaminates putrescine and histamine. The protein may play a role in controlling the level of histamine and/or putrescine in these tissues. It also binds to and is inhibited by amiloride, a diuretic that acts by closing epithelial sodium ion channels.This gene encodes a membrane glycoprotein that is expressed in many epithelium-rich and/or hematopoietic tissues and oxidatively deaminates putrescine and histamine.
