ADDITIONAL INFORMATION

Related Product Information for anti-GNB1 antibody	This is a rabbit polyclonal antibody against GNB1. It was validated on Western Blot using a cell lysate as a positive control. Target Description: Heterotrimeric guanine nucleotide-binding proteins (G proteins), which integrate signals between receptors and effector proteins, are composed of an alpha, a beta, and a gamma subunit. These subunits are encoded by families of related genes. GNB1 is a bet
