ADDITIONAL INFORMATION

Related Product Information for anti-PPP2R1A antibody	This is a rabbit polyclonal antibody against PPP2R1A. It was validated on Western Blot using a cell lysate as a positive control. Target Description: PPP2R1A is a constant regulatory subunit of protein phosphatase 2. Protein phosphatase 2 is one of the four major Ser/Thr phosphatases, and it is implicated in the negative control of cell growth and division. It consists of a common heteromeric core enzyme, which is composed of a catalytic subunit and a constant regulatory subunit, that associates with a variety of regulatory subunits. The constant regulatory subunit A serves as a scaffolding molecule to coordinate the assembly of the catalytic subunit and a variable regulatory B subunit. PPP2R1A is an alpha isoform of the constant regulatory subunit A.This gene encodes a constant regulatory subunit of protein phosphatase 2.
