ADDITIONAL INFORMATION

Related Product Information for anti-DPAGT1 antibody	This is a rabbit polyclonal antibody against DPAGT1. It was validated on Western Blot Target Description: The protein encoded by this gene is an enzyme that catalyzes the first step in the dolichol-linked oligosaccharide pathway for glycoprotein biosynthesis. This enzyme belongs to the glycosyltransferase family 4. This protein is an integral membrane protein of the endoplasmic reticulum. The congenital disorder of glycosylation type Ij is caused by mutation in the gene encoding this enzyme.
