ADDITIONAL INFORMATION

Related Product Information for anti-FOS antibody	This is a rabbit polyclonal antibody against FOS. It was validated on Western Blot using a cell lysate as a positive control. Target Description: The Fos family consists of 4 members: FOS, FOSB, FOSL1, and FOSL2. The family members are leucine zipper proteins that can dimerize with proteins of the JUN family, thereby forming the transcription factor complex AP-1. As such, the FOS proteins have been implicated as regulators of cell proliferation, differentiation, and transformation. In some cases, expression of the FOS gene has also been associated with apoptotic cell death.The Fos gene family consists of 4 members: FOS, FOSB, FOSL1, and FOSL2.
