

Human Vitamin A (VA) ELISA Kit | VA elisa kit

Human Vitamin A (VA) ELISA Kit

CATALOG #
AAA203242

REACTIVITY
Human

PRODUCT SYNONYMS

Vitamin A (VA); Human Vitamin A (VA) ELISA Kit; VA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Competitive
Sensitivity	10 nmol/L
Intra-assay Precision	Intra-assay CV are less than 15%.
Inter-assay Precision	Inter-assay CV are less than 15%.

ADDITIONAL INFORMATION

Related Product Information for VA elisa kit

Intended Uses: This VA-competitive ELISA kit is intended for Laboratory Research use only and is not for use in test or therapeutic procedures. Add sample and VA standards in the plate wells where VA antibodies have been coated. Then add HRP-labeled human VA antigen. The unreacted component will be removed after incubating and washing, and the solid-phase antibody-enzyme-labeled antigen immune complex on the solid surface of the microplate will remain. After adding Chromogen Solution A and Chromogen Solution B, the immune complex will change to blue by HRP catalyzing. It will change to yellow at the end when the adding stop solution works. Measure the absorbance (OD value) at 450 nm using a microtiter plate reader. The concentration of VA in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
