

## Human Nucleophosmin ELISA Kit | NPM1 elisa kit

Human Nucleophosmin ELISA Kit

CATALOG #  
**AAA204609**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Nucleophosmin; Human Nucleophosmin ELISA Kit; NPM1 elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Human                                                             |
| Sequence Length | 259                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 62.5 pg/ml-1000 pg/ml                                             |
| Sensitivity     | 1 pg/ml                                                           |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for NPM1 elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of NUCLEOPHOSMIN in the sample, This NUCLEOPHOSMIN ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus NUCLEOPHOSMIN concentration. The concentration of NUCLEOPHOSMIN in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|             |          |
|-------------|----------|
| NCBI GI #   | 83641870 |
| NCBI GeneID | 4869     |

|                                  |                                |
