

## Human Adipocyte Plasma Membrane Associated Protein ELISA Kit | APMAP elisa kit

Human Adipocyte Plasma Membrane Associated Protein ELISA Kit

CATALOG #  
**AAA204614**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Adipocyte Plasma Membrane Associated Protein; Human Adipocyte Plasma Membrane Associated Protein ELISA Kit; APMAP elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Human                                                             |
| Sequence Length | 416                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 0.625ng/ml-10ng/ml                                                |
| Sensitivity     | 0.1 ng/ml                                                         |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for APMAP elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of ADIPOCYTE PLASMA MEMBRANE ASSOCIATED PROTEIN in the sample, This ADIPOCYTE PLASMA MEMBRANE ASSOCIATED PROTEIN ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus ADIPOCYTE PLASMA MEMBRANE ASSOCIATED PROTEIN concentration. The concentration of ADIPOCYTE PLASMA MEMBRANE ASSOCIATED PROTEIN in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                  |             |
