

Human Toll Like Receptor 7 (TLR7) ELISA Kit | TLR7 elisa kit

Human Toll Like Receptor 7 (TLR7) ELISA Kit

CATALOG #
AAA20520

REACTIVITY
Human

PRODUCT SYNONYMS

Toll Like Receptor 7 (TLR7); Human Toll Like Receptor 7 (TLR7) ELISA Kit; CD287; TLR7 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of TLR7. No significant cross-reactivity or interference between TLR7 and analogues was observed.
Sequence Length	1,049
Assay Type	Quantitative Sandwich
Samples	Human tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	0.78-50ng/mL
Sensitivity	< 0.29ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level TLR7 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level TLR7 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for TLR7 elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to TLR7. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to TLR7. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain TLR7, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of TLR7 in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of TLR7 in human tissue homogenates, cell lysates, cell culture supernates and other biological fluids.
Product Categories/Family for TLR7 elisa kit	Infection immunity; Immune molecule; Pulmonology

NCBI AND UNIPROT INFORMATION

NCBI GI #	549439596
Molecular Weight	121,213 Da
NCBI Official Full Name	Toll like receptor 7, partial
UniProt Protein Name	Toll like receptor 7
UniProt Gene Name	Tlr7
UniProt Entry Name	U5LJC1_RATTI

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
