

Human Activated Coagulation Factor IX ELISA Kit

Human Activated Coagulation Factor IX ELISA Kit

CATALOG #
AAA205936

REACTIVITY
Human

PRODUCT SYNONYMS

Activated Coagulation Factor IX; Human Activated Coagulation Factor IX ELISA Kit; Activated Coagulation Factor IX elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sensitivity	10 pg/mL
Intra-assay Precision	Intra-assay CV is less than 15%.
Inter-assay Precision	Inter-assay CV is less than 15%.

ADDITIONAL INFORMATION

Related Product Information for Activated Coagulation Factor IX elisa kit

Intended Uses: This ACTIVATED COAGULATION FACTOR ELISA kit is intended Laboratory for Research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of ACTIVATED COAGULATION FACTOR in the sample, this ACTIVATED COAGULATION FACTOR ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus ACTIVATED COAGULATION FACTOR concentration. The concentration of ACTIVATED COAGULATION FACTOR in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
