

Human Virus Induced Signaling Adapter ELISA Kit | MAVS elisa kit

Human Virus Induced Signaling Adapter ELISA Kit

CATALOG #
AAA206310

REACTIVITY
Human

PRODUCT SYNONYMS

Virus Induced Signaling Adapter; Human Virus Induced Signaling Adapter ELISA Kit; MAVS elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	540
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	0.625ng/ml-10ng/ml
Sensitivity	0.1 ng/ml

ADDITIONAL INFORMATION

Related Product Information for MAVS elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of VIRUS INDUCED SIGNALING ADAPTER in the sample, This VIRUS INDUCED SIGNALING ADAPTER ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus VIRUS INDUCED SIGNALING ADAPTER concentration. The concentration of VIRUS INDUCED SIGNALING ADAPTER in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	27924145
NCBI GeneID	57506

NCBI Official Full Name	Virus-induced signaling adapter
NCBI Official Synonym Full Names	mitochondrial antiviral signaling protein
NCBI Official Symbol	MAVS
NCBI Official Synonym Symbols	IPS1; VISA; IPS-1; CARDIF
NCBI Protein Information	mitochondrial antiviral-signaling protein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
