

## Mouse Immunoglobulin M (IgM) ELISA Kit | IgM elisa kit

Mouse Immunoglobulin M (IgM) ELISA Kit

CATALOG #  
**AAA206830**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Immunoglobulin M (IgM); Mouse Immunoglobulin M (IgM) ELISA Kit; IgM elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Mouse                                                             |
| Sequence Length | 110                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 200 mug/ml-3200 mug/ml                                            |
| Sensitivity     | 10 mug/ml                                                         |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for IgM elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of IgM in the sample, This IgM Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus IgM concentration. The concentration of IgM in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                         |              |
|-------------------------|--------------|
| NCBI GI #               | 186200       |
| NCBI Official Full Name | IgM, partial |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
